

VENT MASTER VALVE RANGE

Vent Master HR – CSG Coal Seam Gas & Associated Water

Vent Master PX – All Media Types

Vent Master VM – Potable Water

Quality
ISO 9001

SAI GLOBAL

Manufactured under a
Quality Management
System that is certified
to ISO9001

POTABLE WATER - VENT
MASTER VM

ALL MEDIA – VENT MASTER PX

CSG – VENT MASTER HR

Vent Master Valves are used worldwide for the control of gases in pipelines. Demanding markets including heavy industry, mining, commercial and utilities. Vent Master valves control the removal and introduction gas and air. Our range allows you to reach and maintain maximum pipeline performance minimise downtime and keep your operations running smoothly and safely – translating into lower operating costs.

Features

- Anti-hammer/surge protection technology
- Large orifice for maximum air transit performance
- Secondary small orifice for automatic venting in a pressurised pipeline
- 316SS (optional Super Duplex) and engineered plastic construction
- Threaded and Flanged connections
- Drop tight sealing at low pressures
- Lightweight

Benefits

- Reduced corrosion in metal pipelines
- Increased flow rates and pumping efficiency
- Prevents vacuum collapse in pipelines
- Allows for better evacuation when emptying lines
- Easy and safe installation and serviceability
- Australian designed and manufactured under ISO9001 certified system

The Range...

Vent Master VM – venting air in clean water pipelines

Vent Master PX – handles all media

Vent Master HR – venting methane in coal seam gas water lines

Use Vent Master
and...

- ✓ Maximise system efficiency
- ✓ Protect valuable infrastructure
- ✓ Prevent vacuum collapse
